

# SEA stakeholders map

In its role as a manager of public transport infrastructure, SEA is committed to acquiring in a planned and structured way the spaces and services to airport operators. This is applicable to extension works at terminals, in making available spaces and services to airport operators. SEA Group stakeholders map

The identification and mapping of the stakeholders of SEA and the relative strategic approach which the company has adopted are the result of the identification and role of the stakeholders. Managers have begun to introduce in their evaluations a stakeholder management levers. The objective is to understand which stakeholder relationship levers
