Methodological note

The SEA Group 2012 Sustainability Report (hereafter also the "Group?"), in its third edition was prepared according to the GRI Standards. At the end of the document the GRI Content Index and the self-declaration of the application level of the GRI guidelines are provided.

Reporting principles

Inclusivity, Materiality, Sustainability context

The principal social and environmental impacts of the Group concerning stakeholders are outlined and the relationship with them is described. The reporting is complete and transparent.

Completeness

In relation to the completeness principle, reference should be made to the previous paragraph "Reporting process".

Report quality principles

Balance The figures are displayed in an objective and systematic manner. The result indicators reflect the assets and liabilities of the Group.

Comparability, Clarity

The disclosure contains clear and accessible charts, tables and language. The indicators are compared with the industry and other companies.

Accuracy

The figures are checked by the various department heads.

Timeliness

The document is produced annually.

Reliability

The document is approved by the Board of Directors and subject to external and independent audit by PricewaterhouseCoopers.
